Bandung, West Java

I am an Informatics Engineering student with a strong interest in data analysis and data-driven problem solving. I have skills using Python, SQL, Excel, as well as data visualisation tools such as Tableau and Power BI. With experience in processing and analysing data, I am ready to support business decision making through data-driven insights. I am enthusiastic to learn new things and contribute to challenging projects.

Work Experiences

Freelancer.com Feb 2021 - Mar 2024
